DETAILED ACTION

Allowable Subject Matter

1. Claims 47-68 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art does not teach or fairly suggest at least one call control node comprising narrowband switching fabric; switching intelligence for providing call control for said narrowband switching fabric and plurality of connection control nodes; a data structure containing bandwidth data identifying an amount of available bandwidth on at least one of the plurality of paths; and means for selecting at least one of the paths for switching an incoming call through the broadband network interconnecting the plurality of connection control nodes, each comprising broadband switching fabric, using bandwidth data and broadband switching fabric, as specified in independent claims 47 and 61.

The prior art does not teach or fairly suggest at least one call control node comprising narrowband switching fabric; switching intelligence; means for determining quality data related to the quality of packet transmissions on at least one of the plurality of paths within the broadband network; means for determining bandwidth data identifying an amount of available bandwidth on at least one of the plurality of paths; and means for selecting at least one of the paths for switching an incoming call through two of the plurality of connection control nodes, each comprising broadband switching fabric, using bandwidth data and quality data, as specified in independent claim 57.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
